SAMUEL T. WHEELWRIGHT'S

INSTRUCTIONS

IN THE

INDIAN CLUB EXERCISE.

Indian Clubs within the last few years have become the most popular method of developing the muscles of the body, and keeping it in a healthy and vigorous state. For in-door exercise there is nothing that can compete with them, the exercise far excelling the tedious motions required in using Dumb-Bells, Pulley-Weights, &c., they being the same thing over and over again; while, with clubs, new motions, changes, and combinations are continually entering the mind, making it a source of pleas gure, as well as benefiting the system. All persons whose avocations are of a sedentary nature should devote a portion of their time each day to this exercise, in the morning after rising, and at their place of business, after business hours; and they will soon find themselves instilled with new life, and that labor, instead of being a burden, will become a pleasure. These are facts, and something which all sensible persons-will admit.

The Author is aware there has been wanting one very important thing, and that is, a cheap and sim-

1280046

ple work on instruction in the art of club-swinging, thus enabling all classes to possess themselves of it; and, believing himself capable in every way of giving a simple and accurate description of all the most important motions, taking particular care to word it in such a manner that it may be easily understood by all, he respectfully submits this work to all those that wish to perfect themselves in this art.

We will give our first attention to the motions with the single club, it being very necessary to learn these thoroughly first, as the motions with double clubs are merely a combination of them.

You will perceive, by the Plates, that the figure in each is represented standing with the back towards the reader, for the purpose of more clearly explaining the motions; enabling the learner, while holding the engraving before him in one hand, to follow the course of the club in the engraving with the other, without reversing the motion, which would be necessary if the figure faced the reader. This method makes this the simplest work in existence, and all persons who have undertaken to learn from other works will appreciate its value.

POSITION.

If convenient, toe a line on the floor; if not, imagine yourself toeing one; and I would wish particularly to impress upon your mind that, in most all of the motions with clubs, both single and double, the clubs are kept, while in motion, parallel with this line. This is very necessary, as it adds greatly to the gracefulness of the motions. The

heels a few inches apart, the feet well spread; stand in an easy position, with the chest extended and chin slightly raised, the left arm hanging by the side; the club within the right hand, with the knuckles outwards, and the hand opposite the right breast and a few inches from it, with the club perpendicular; the elbow close to the side, the body should be kept square to the front. In all of the following motions, it will be understood, you are to start from this position.

Learn all these motions thoroughly with each hand. You merely reverse the motion to perform them with the left. The first motion is,

THE WREATH.

This is one of the most important motions, it being necessary to execute this in a great many of the others. You commence by raising the right hand till it arrives about three inches above the centre of the head, the club leaning slightly towards the left; then dropping the club behind the back, pointing to the left, being careful to keep it parallel or pointing in the same direction with the line, and allowing it to describe a circle behind your back, the centre being your hand, which moves from the top of your head to the back of your neck. hang on to the club as if you were afraid of dropping it, but when you start the circle give the club a jerk, and let the force and its weight carry it around the circle. As the circle is nearly terminated, you twist your wrist to the right to keep the club parallel with the line, and then bring it over

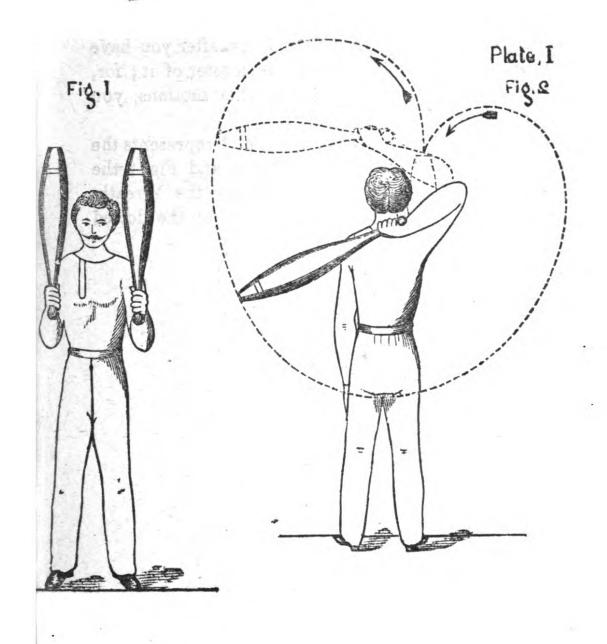

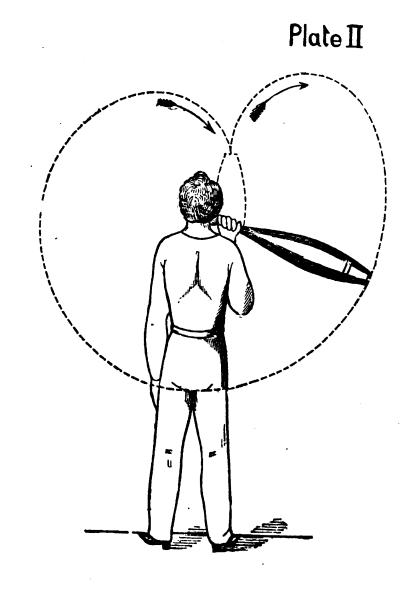

the right shoulder, stopping when the hand reaches its former position—that is, opposite the right breast.

Do not at any time allow the hand to go below the shoulder. After learning it with the right, change to the left. Do not imagine, after you have executed it a few times, you are master of it; for, after trying one or two of the other motions, you will be very likely to forget it.

In the engraving (Plate I.), Fig. 1 represents the position of the body and the clubs, and Fig. 2 the position of the hand while executing the Wreath, the course of the club being shown by the dotted lines.

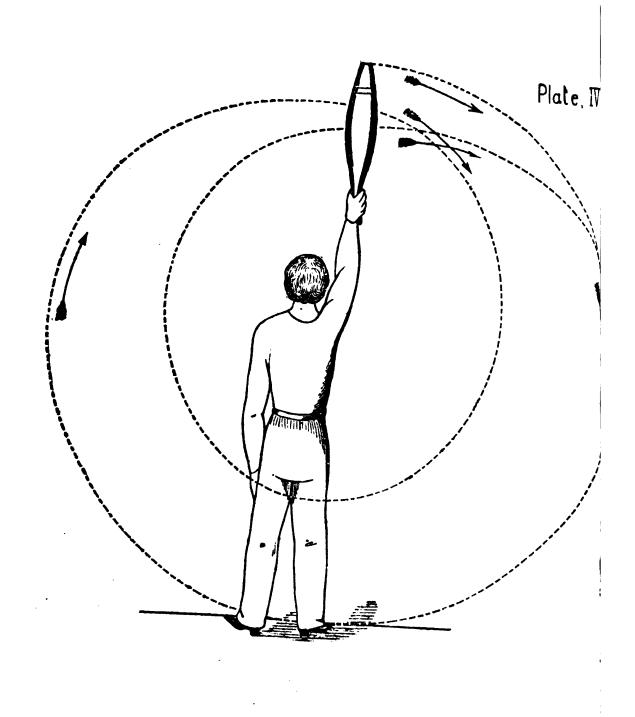

MDIAN OLUB EXERCISE.

THE SHOULDER TWIST.

Raise the hand till it arrives opposite the right ear, and then twisting the wrist so that the thumb will be directly to the right, and dropping the club towards the right behind the shoulder, releasing the club with the three last fingers, merely holding it with the forefinger and thumb parallel with the line, the hand moving a little below and back of the ear, and keeping it in that position, thus allowing the club to clear the shoulder, giving it a jerk as described in the Wreath, and allowing it to describe a circle, twisting the wrist to keep it on the line as the club passes around. At the end of the circle bring the hand back to the starting-point.

Plate II. shows the position of the hand and eval, while executing the circle.

Digitized by Google

ř

THE SHOULDER CIRCLE.

Raise the club perpendicularly at arm's length as before, knuckles to the rear, and swing the club at arm's length to the right, parallel with the line describing a circle in front of the body, the shoulder being the centre, giving it a jerk as before, keeping the body square to the front. When the hand reaches the position in which it was when the circle was first started—that is, at arm's length above the head—you twist your wrist, bringing the thumb to the right, and let the club drop behind the shoulder, the hand dropping at the same time below and back of the ear, releasing the club with the three last fingers, merely holding it with the forefinger and thumb, the club describing a circle (this, you will recognize, is the Shoulder Twist); then let the hand and club be again extended at arm's length, not perpendicularly, but more towards the right, and then execute the first circle over again; making, as in the last motion (the Head Circle), a continuous line and a circle within a circle.

Learn thoroughly with both hands; with the left start the club towards the left.

Plate IV. shows the position of the hand and club while starting the large circle.

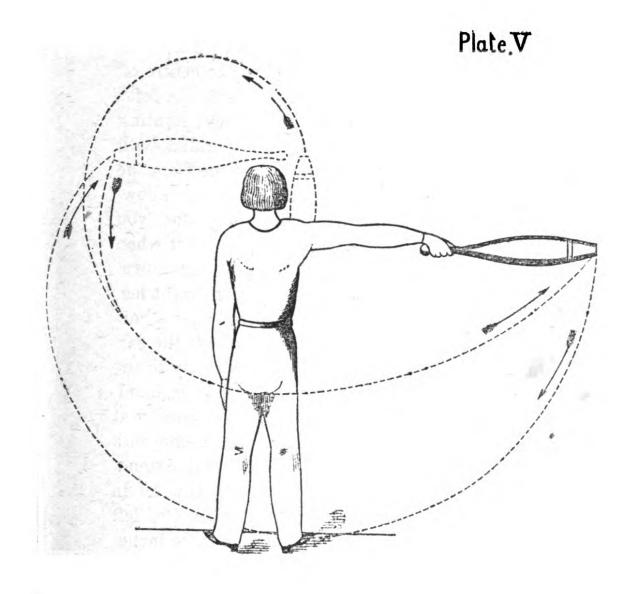

EXTENSION.

This, as a single club motion, is not as graceful as the others, but with two clubs makes a very pretty one. You commence by raising the hand till it arrives about three inches above the centre of the head, the club leaning slightly towards the left; then dropping the club behind the back, pointing to the left, not forgetting to keep it parallel with the line, the hand moving at the same time from the top of the head to the back of the neck, and allowing the club to describe a circle (this, so far, you will perceive is the same as the Wreath); but when the club arrives to the position (pointing downwards) parallel with and opposite to your right leg, you quickly twist your wrist and bring your elbow to the front, letting the hand move towards the ear, raising the club so. that it will point directly to the right, without altering the position of your hand, and then extend your hand and club horizontally at arm's length to the right; you then drop the club towards the floor, keeping the arm and club extended, swinging the club in a circle towards the left in front of the body, and, when it reaches the left shoulder, bring the hand to the position three inches above the head, keeping the club horizontal, and then execute the Wreath and the rest of the above motion over again.

Learn this thoroughly with both hands; with the left start the club towards the right.

Plate V. shows the position of the hand and club at arm s length to the right. Plate IX. shows the motion with the left hand.

These five motions that I have just explained are the five principal motions with clubs, all the double motions being a combination of them. There are, of course, a number of twists with the wrists and changes of the body, which some call motions; but after you have thoroughly learned these that I have given, the others will soon come to you, and which I do not consider distinct motions, and will only tend to confuse instead of benefiting the learner.

We will now proceed with the double motions. In almost all of these motions there is one thing you will find very difficult to overcome at first: that is, a tendency for one hand to follow the other. You have, of course, noticed by this time that, in executing the single motions with the right and left hands, the club moves in opposite directions, which they also do in the double motions, moving independent of one another; hence, the difficulty of keeping them from following one another.

The position of the body is the same. Remember the line; the left-hand club is held in the same position as the right, the left hand opposite the left breast; and this position, it will be understood, is the starting-point of all these motions.

THE DOUBLE WREATH.

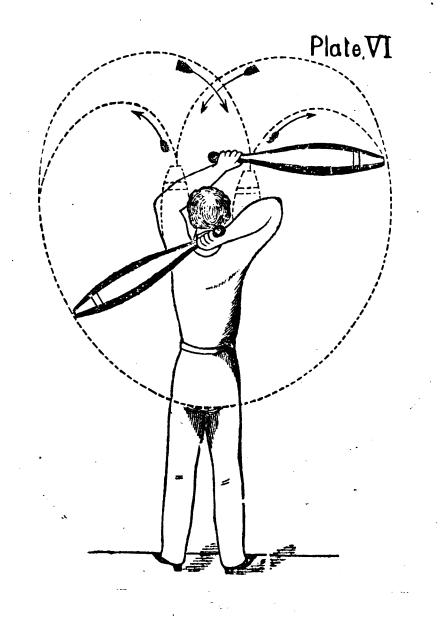

Start the right-hand club as explained in the single Wreath, and follow with the left when the right hand reaches the back of the neck, keeping up a continuous circle, not bringing the hands back to the breasts, but executing the motion alternately,

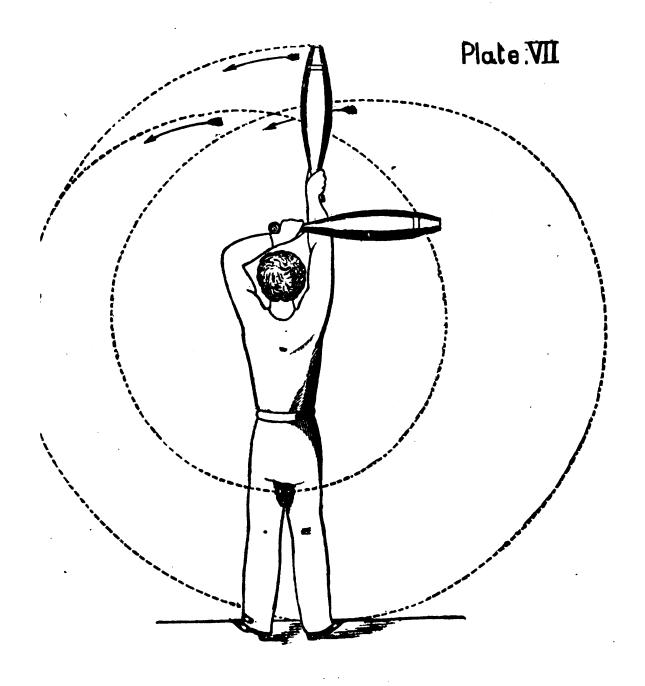

first right, then left, quickly. You may, if you wish, bring the hands back to the position opposite the breasts at the end of each circle; but this will have to be done much slower than the other. (See Plate VI.) The motion is performed both ways. This is considered one of the best motions for developing the muscles.

Plate VI. represents the position of the hands and clubs while in motion, stopping at the end of each circle.

THE SHOULDER TWIST.

This is not considered a double motion, and is only used in combination with other motions.

THE DOUBLE HEAD CIRCLE.

In this motion you will find the difficulty I spoke of, in keeping the clubs apart. Start the right hand as explained in the single motion (Plate III.), at the same time executing the latter part of the motion first (that is, the Wreath) with the left, and then connecting it with the large circle. Thus you see that one hand has the start of the other, and moves independent of it. If you practise this well you will soon get the "knack" of keeping the clubs apart, and will help you considerably in performing the other motions.

Plate VII. shows the position of the hands and clubs as they start.

In this and all of the following engravings you will notice I have not shown the course of the left-hand club, merely showing the positions of the hands when the motion is started, for the reason that, as both are the same with the left and right, except moving in different directions, it would tend to confuse the learner. If you have been careful to learn the single motion with the left as well as the right hand, you will find it very easy to comprehend the description given.

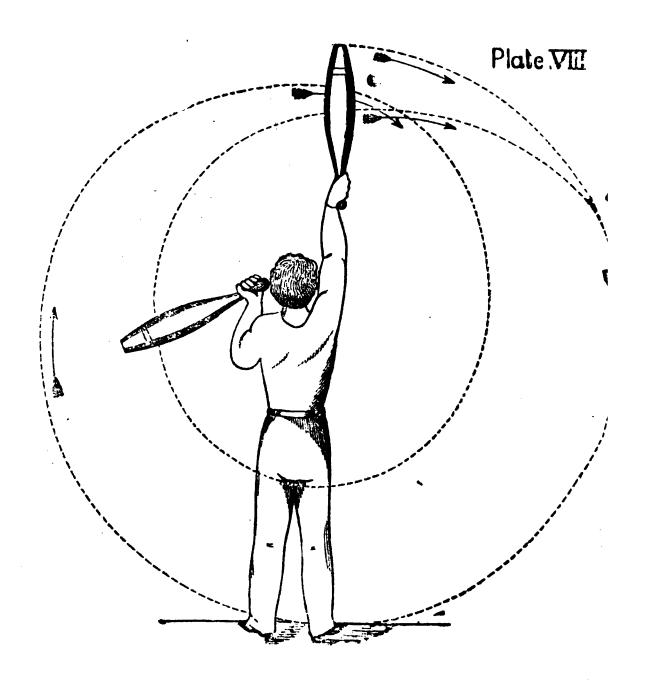

THE DOUBLE SHOULDER CIRCLE.

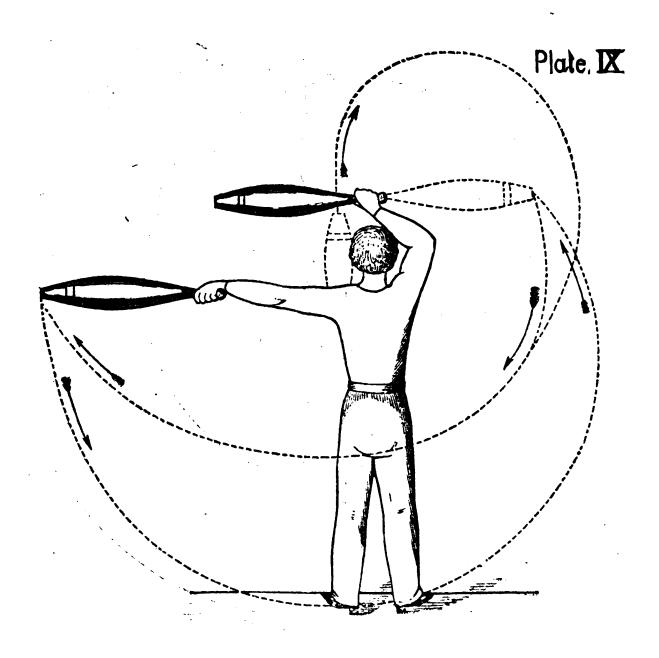

Start the right hand club as explained in the single Shoulder Circle, Plate IV., and at the same time execute the latter part of the motion first (that is, the Shoulder Twist) with the left hand, and then connecting it with the large circle. In this motion the learner is very apt to face a little to the left and right; but there is no necessity of doing so, and great care should be taken to avoid it, as so doing throws the clubs off the line.

Plate VIII. shows the position of the hands and clubs as they start.

THE DOUBLE EXTENSION.

Start both clubs together. The right hand commences as in the single Extension motion, keeping the club in motion as therein described, and the left hand at the same time being extended at arm's length horizontally to the left, thus placing the two clubs for a moment in a parallel position, then dropping the left-hand club towards the floor, allowing it to describe a circle in front of the body; and then, when it reaches the left shoulder, execute the Wreath. You will notice that the clubs become parallel to each other as they are shifted from one shoulder to the other. This is a pretty and graceful motion, if done well.

Plate IX. shows the position of the clubs as they start.

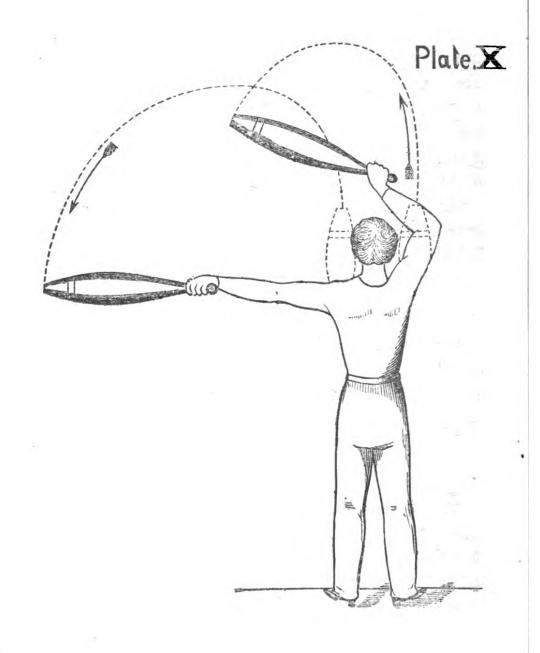

THE WINDMILL.

This motion is considered the finest and most graceful one of any in the club exercise, the clubs, while in motion, resembling the arms of a windmill revolving. It is a combination of the Head Circle (Plate III.) and the Shoulder Circle (Plate IV.). Both clubs start together. The right hand performs the Head Circle, commencing at that part of it resembling the Wreath; that is, describing a circle back of the head, and then executing the large circle. The left hand executes the Shoulder Circle, commencing exactly as explained in the single Shoulder Circle (Plate IV.), only reversing the motion, swinging the club to the left instead of to the right, the hand following the right. Here you will find the great need of the "knack" of keeping the clubs apart, as each hand performs a distinct motion by itself. You can reverse this motion, making the clubs revolve to the right by merely changing the motions with the hands, executing the Head Circle with the left and the Shoulder Circle with the right, letting the right hand follow the left.

Plate X. shows the position of the clubs at the start.

Digitized by Google

Original from UNIVERSITY OF MINNESOTA

PARALLEL.

This motion is almost exactly the same as the Windmill, only, instead of allowing one club to start ahead of the other, you start both precisely at the same time and in the same direction, keeping the clubs close and parallel to each other through all the movement. It does not, to a spectator, resemble the Windmill at all. You commence by causing the right hand to execute the Head Circle and the left the Shoulder Circle, starting both exactly as explained in those motions with single clubs. Reverse it by executing the Head Circle with the left hand and the Shoulder Circle with the right.

HEAD CROSS

Is exactly the same as the Wreath (Plate I.), only the clubs start at the same time, crossing behind the head, first the right club above the left, then the left above the right, changing each time they cross.

DOUBLE CROSS.

Cross them once behind the head as before, and then swing the clubs out at arm's length to the right and left, and allowing them to describe a circle in front of the body, crossing each other at the legs, and, when they reach the head, perform the Head Cross again.

WREATH AND SHOULDER TWIST.

Execute the Wreath with the right hand and the Shoulder Twist with the left, starting both clubs together exactly.

DOUBLE WREATH AND HEAD CIRCLE.

Execute the Wreath with the left hand without stopping, and at the same time execute the Head Circle with the right, starting as explained in the single Head Circle, and when it reaches that portion of the motion which requires the execution of the Wreath, perform the Double Wreath a few times, taking pains to let it come in nicely, and then swing the right-hand club to the left at arm's length, again performing the Head Circle, taking care to keep the left executing the Wreath. Reverse it, letting the right hand execute the Wreath and the left the Head Circle.

SHOULDER TWIST AND HEAD CIRCLE.

Executes the Shoulder Twist with the left hand without stopping, and the Wreath a few times with the right, and then suddenly swing the right club to the left and execute the Head Circle, keeping the left performing the Shoulder Twist; and when the right-hand club reaches that portion of the Head Circle which requires the execution of the Wreath. perform the Wreath a few times, taking pains that the clubs will come close and parallel to each other, and then again execute the Head Circle. Reverse

it, letting the right hand perform the Shoulder Twist and the left the Head Circle.

WREATH AND SHOULDER CIRCLE.

Execute the Wreath with the right hand and the Shoulder Twist with the left, starting both clubs together, as explained in the description of the motions. Having performed this a few times, suddenly extend the left club out at arm's length and describe a circle in front of the body (keeping the right hand executing the Wreath), as explained in the Shoulder Circle; and when the club reaches that portion of the Shoulder Circle that requires the execution of the Shoulder Twist, let the two clubs come in nicely together. This can be reversed the same as the rest.

ELBOW TWIST.

In this motion you twist the wrists, bringing the backs of the hands square to the front, throwing them each a little outwards to the right and left, keeping the elbows close into the sides, at the same time dropping both clubs straight in front of you, not allowing the hands to move from their positions, giving the clubs a jerk and causing them to describe a circle. You may start both clubs together, or you may start one ahead of the other. In this and the following motions you do not keep the clubs parallel with the line, but at right angles.

BACKWARD AND FORWARD SWING.

Let your right foot go to the rear of the teft about a foot, as you require a brace in this motion. Commence by letting the clubs both together fall over the shoulders as far back as you can, bending the body a little to let them go well back, being careful not to touch your back or shoulders with the clubs or the hands; then give them a sudden jerk forward, sending them out at arm's length, describing a circle, and let them go as far beyond the legs as the arms will permit; then jerk them forward again at arm's length, letting them go over the shoulders as before. You can also execute this by allowing one club a start of the other. This is a splendid exercise for the chest.

ELBOW TWIST AND THE BACKWARD AND FORWARD SWING.

Let the clubs fall over the shoulders as described above, and, after jerking them forward and when they reach a perpendicular position, you execute the Elbow Twist, and then swing them out at arm's length, proceeding as above explained. Each time the clubs come back from behind the shoulders, per form the Elbow Twist. These three last motions are generally executed by first facing to the left and performing them, and then facing to the right.

The tearner will by this time readily see that the five first motions are the principal ones—viz., The

Wreath, Shoulder Twist, Head Circle, Shoulder Circle, and Extension—and that all the other motions are merely a combination of these; and after having become master of these with single and double clubs, you will find no difficulty in performing any other motions that any person may do; and also, with a little practice, you will be able to connect a number of these motions together, not being obliged to stop at the termination of any one motion, but to execute them one after another, making a very pretty and graceful combination.

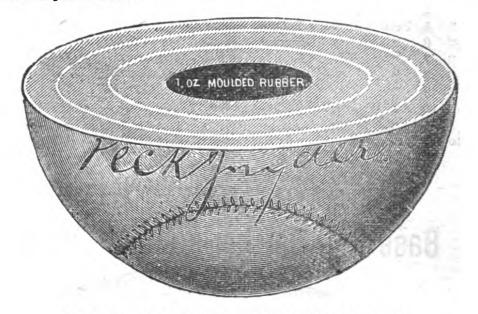

NOTICE

-TO-

Base-Ball Players and Dealers in Base-Ball Goods.

We are offering this season, in addition to our popular brands of AMATEUR and PROFESSIONAL DEAD BALLS our new TREBLE BALL, which we consider the most desirable Ball ever offered to the fraternity. A glance at the illustration below, which represents a Ball cut in half, will show you how the Ball is made and of what it is composed. The center contains 1 oz. of moulded rubber, on which is wound the finest yarn, until you have the Ball one fourth the size; we then put on a light cover, which holds the Ball in shape; we then wind the Ball to three-fourths the size, and again put on a light cover; the Ball is then put in the hands of the finisher, who winds the outside layer of yarn and then puts on the outside cover. The advantage of this Ball is, that they retain their shape with the hardest batting, and yet are pliable to the hands of the player. None genuine unless stamped as below.

REDUCED WHOLESALE PRICE LIST.

P. & S	. New Treble	Ball,	Red or White	for	Match	Games,	Per Doz. \$15.00	Sample Balls, By Mail, Each. \$1.50.

Fishing with Hook and Line. A Manual for Ang	lers. B	y Frank	:
Forrester. 8 beautiful illustrations, cloth			

This Testimonial is only one of hundreds in recommendation of ou "Red Dead Ball."

CINCINNATI, November 10th, 1870.

Messrs. Peck & Snyder:

Gents—The "Red Dead Balls" you sent me I have given a fair trie both to practice and play matches with, and am satisfied myself that it is the best ball I have yet played with. The dark red color I find is a great benef on a sunny day,—it rids you of that dazzling whiteness which the white be causes.

I for one can recommend it to any "Base Ball Club," or the Whi Dead Ball manufactured by you for Spring and Fall use.

I am, yours, &c.,

GEORGE WRIGHT,

Short Stop for the "Red Stocking B. B. Club."

Samples of our Red or White Dead Balls, sent by Mai \$175 each.

Address orders to

PECK & SNYDER, 126 Nassau St., N.Y.

NEW NOVELTIES

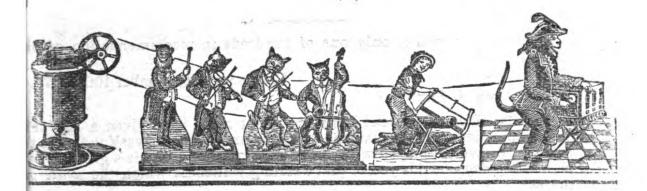

FOR THE

toy steam engine

These consist of mechanical figures of various designs, representing different scenes, and making most attractive additions to the Toy Engine. They can be run separately or a dozen at a time.

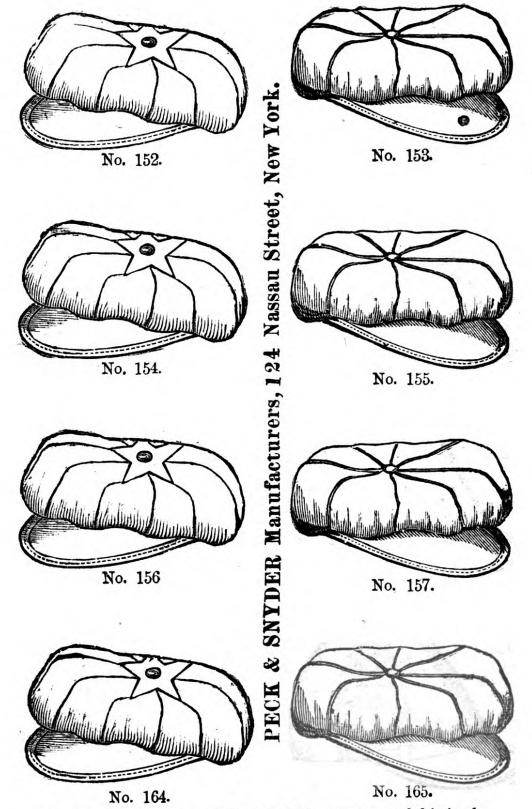

No. 1—Dollar Engine and above figures on board, with pulleys, strap, &c., all complete, packed in wooden box for shipping..\$3 50

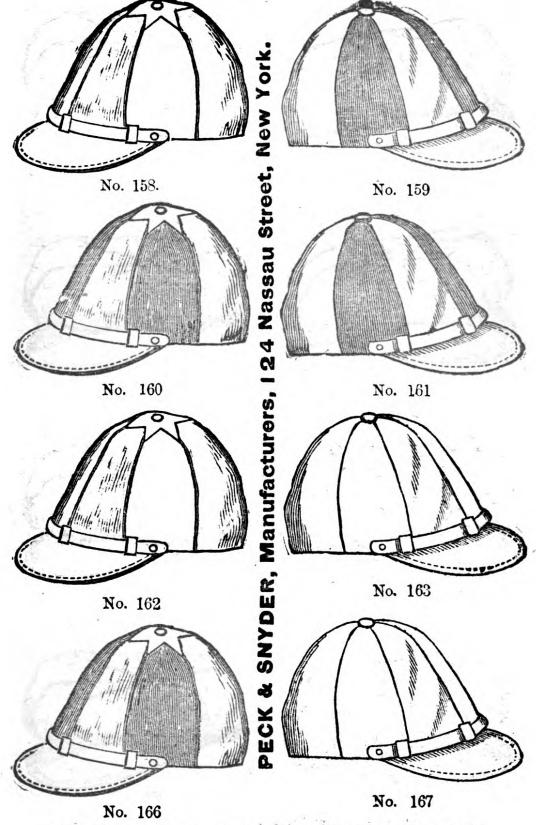

Sent by Express, C. O. D.

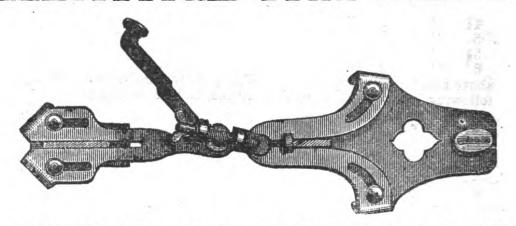

For Prices of the above Styles, see first cover page of this book.

TRADE LIST OF

PECK & SNYDER'S

American Club Skate

The above illustration shows the mode of operating the clamps of the AMERICAN CLUB SKATE. The clamps are first adjusted to fit any width of sole or heel, by turning the thumb screw. When once adjusted they are always adjusted; and by placing the lever in position, the sole and heel clamps are fastened securely to the foot. The following are a few of the reasons why we claim for the AMERICAN CLUB SKATE a superiority over any skate ever offered to the public:

There being no nuts, screws, parts, wrench or key, there is nothing to lose or get out of order, all parts being riveted.

They are more simply and easily adjusted, to suit any size of boot or shoe, than any other skate in market. Dealers all appreciate this fact. They do not need any key, wrench or other apparatus to adjust them, and to be often lost when wanted—being complete in themselves.

One motion of the lever fastens them securely or removes them instantly.

Both the lever and adjusting screw being self-locking, there is no possibility of loosening or unfastening.

They obviate the necessity of any previous preparation of the boot or shoe with plates or other fixtures.

They are self-adjusting to any size of sole or heel.

They have been thoroughly tested by the best experts in the world, and everywhere conceded to be unequalled, which the rapidly increasing demand for them during the past five years also demonstrates.

They are made of the very best material to be obtained, no common or cast iron skates being manufactured. The runners are all hardened and tempered by Wilson's celebrated patent process.

Every pair is tested and warranted, and no other skate fastening ever invented will stand the severe tests to which this is subjected.

They are more durable and less liable to get out of order than others on account of their simplicity of construction. Original from

PECK & SNYDER'S NEW AND IMPROVED HORIZONTAL BARS. For Gymnasium, Stage or Parlor. There has long been felt in families (especially where there are young children) the want of a simple but effective means of physical culture, now universally admitted to be so essential to health. It is confidently believed that the above apparatus will efficiently supply this want, as it will be found in the highest degree simple, strong, portable, light, neat, well-finished, and cheap. It can be fixed easily in a few minutes in any room, and as quickly removed; and is adapted for both sexes and all ages. The fastenings are most ingeniously arranged to adjust the bar to any height. Height of upright 8 feet; it can be adjusted as low as 4 feet, and regulated to use from a four to a six foot bar. With two pairs of the Iron Stanchions very strong and neat Parallel Bars can be made.
